

OILSPY

Underground water supervision
Rosny-sur-Seine gas station

Gas station supervision

Installation of two OILSPY systems to detect hydrocarbon presence in the ground water located under the gas station in Rosny-sur-Seine.

Customer

ELF ANTAR

Objective

For the Elf Antar network, it was a test to qualify the OILSPY technology in gas stations.

Context

The gas station had experienced a pollution of the ground water. Elf displayed important means to take care of the pollution in emergency in order to prevent a contamination of the boring wells.

Supplied equipment

- OILSPY Piezo version
- Alarm station
- Radio transmission and reception
- Training and installation follow up

Innovation

Radio transmission through a PVC plug.
